

ESCAIDE 2022 Newsletter 3 | 3 August 2022

ESCAIDE 2022 updates

Registrations are open

ESCAIDE 2022 is offered in a hybrid format to ensure inclusiveness and ease of attendance from different countries with varying degrees of travelling limitations, and to contribute to environmental sustainability by reducing carbon footprints. In-person attendance to ESCAIDE 2022 is limited, but online attendance is offered to everyone who wishes to attend the conference.

If you would like to attend the conference in-person, please register until 5 September. Note that physical attendance will be confirmed only after the screening of all incoming registrations, while online attendance will be confirmed instantly. For online attendance, the registrations will remain open until the conference starts. We remind you that both online and physical attendance are free-of-charge, no registration fee is collected.

Abstract selection results: big thanks to all our authors and reviewers

The abstract selection process has been completed and the results were communicated to authors early in June. Over 430 abstract submissions were received, and ~170 were selected to be presented at the conference. The volume and standard of submissions resulted in a competitive selection process, which will contribute to the scientific quality and relevance of the content presented at ESCAIDE 2022. Congratulations to those who were successful, and an immense thank you to the ESCAIDE reviewers who contributed to the abstract review process.

A late-breaker abstract call will be open from 31 August–14 September for abstracts reporting data that was unavailable before the deadline for submission in the general call for abstracts for ESCAIDE.

Plenary sessions

The Scientific Committee have developed sessions for ESCAIDE 2022 on pertinent topics in the field that they felt should be addressed at this year's conference, inviting world class speakers to share their experience, discuss and debate. The five sessions will focus on ethics in pandemic control, refugee health, managing infodemics, and the impact of the COVID-19 pandemic on advances in vaccination and surveillance.

Funding Initiative: congratulations to the winners

The ESCAIDE Funding Initiative supports early-career public health professionals to present their work at the conference. This year, six eligible applicants who had an abstract selected to be presented at ESCAIDE 2022 and indicated their interest in being considered for the ESCAIDE 2022 Funding Initiative, have been granted funds to travel to Stockholm in November. Congratulations to the 2022 winners, and we hope to keep supporting colleagues from different countries in the future.
